Upload Design Artwork

How to setup and upload your designs

Having Your Artwork Print Ready

We recommend using software like Adobe Illustrator, Indesign or Photoshop to design your greeting cards. Free software will work just fine as long are you can design in CMYK and the DPI is set to 300.

The artwork size needed is 154mm (wide) x 156mm (high), this size includes the necessary bleeds.

Card Size: 150mm x 150mm
Bleed: 3mm Top, Bottom, Right and 1mm left
Final Artwork Size: 156mm x 154mm
Resolution: 300dpi

Colour Mode: Design in CMYK then export in RGB

Format: jpg or png and set to high quality 300dpi RGB

You can download templates from the FAQ's or card upload page.

Upload Your Designs

To upload your designs just click the Cards tab on the top of the page. When you're on this page you'll see a red button with a plus sign on the bottom right of the page. Click this and you'll see this screen.
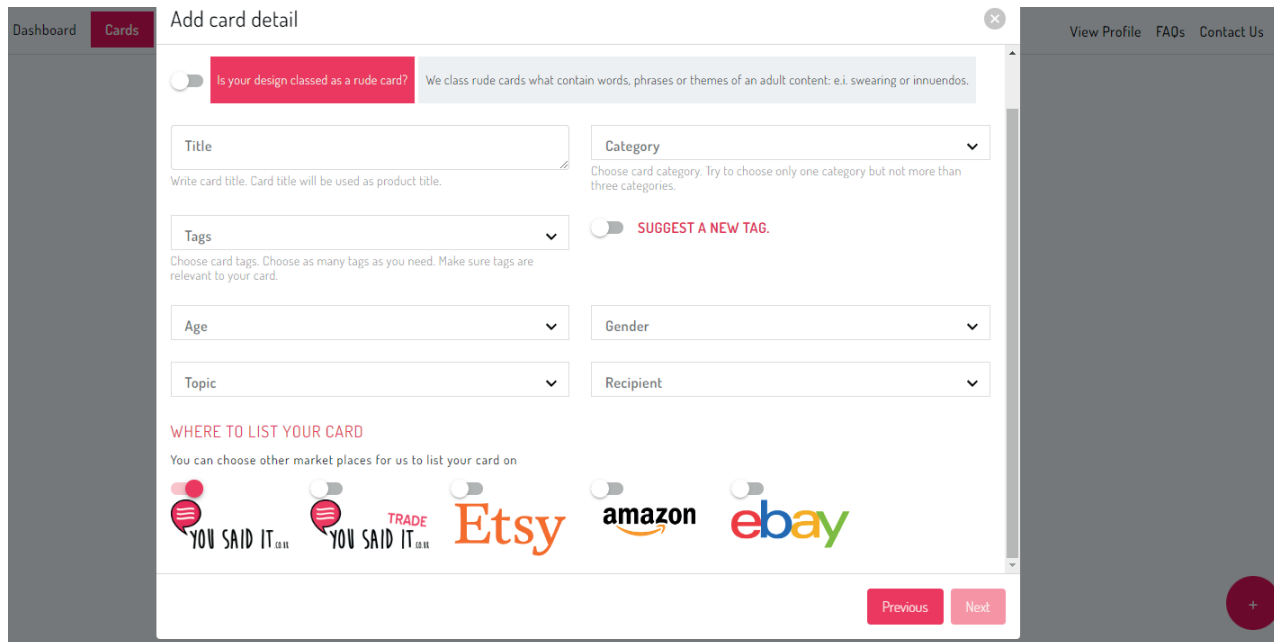

At the moment you'll only have access to our static card uploader, so just click the static cards button.

You should now see this screen. This page is used to upload your artwork. Please make sure your artwork is 300PDI, the correct size, RGB and under 5MB.
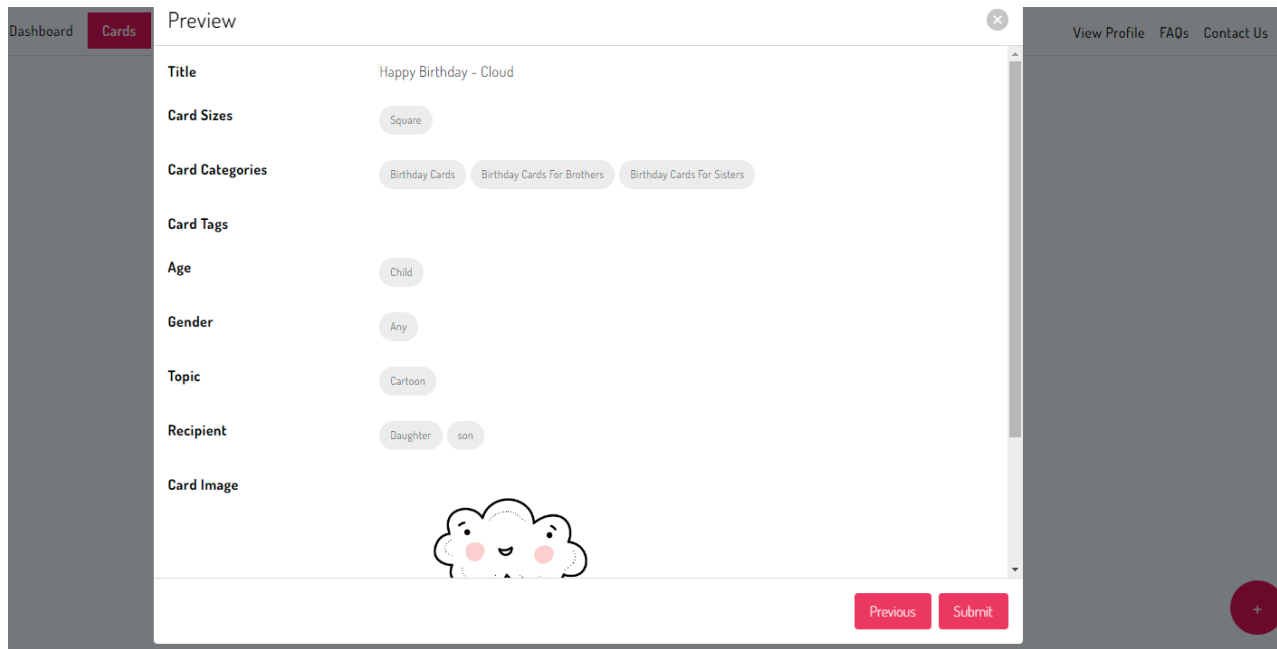

Your uploaded artwork will show in the box you dropped your artwork in. If you're happy with how it looks, just click Next.

On this page we'd like you to input a title for your artwork. This will be used on the product page. On this page you can also choose the category we'll display your design in. You can also set tags and choose the age, gender, topic and recipient your card is design for.

On our network you can choose where you would like us to sell your design. By default we only select our site but you can allow us to sell your design on our trade website, our Etsy, Amazon or Ebay store.
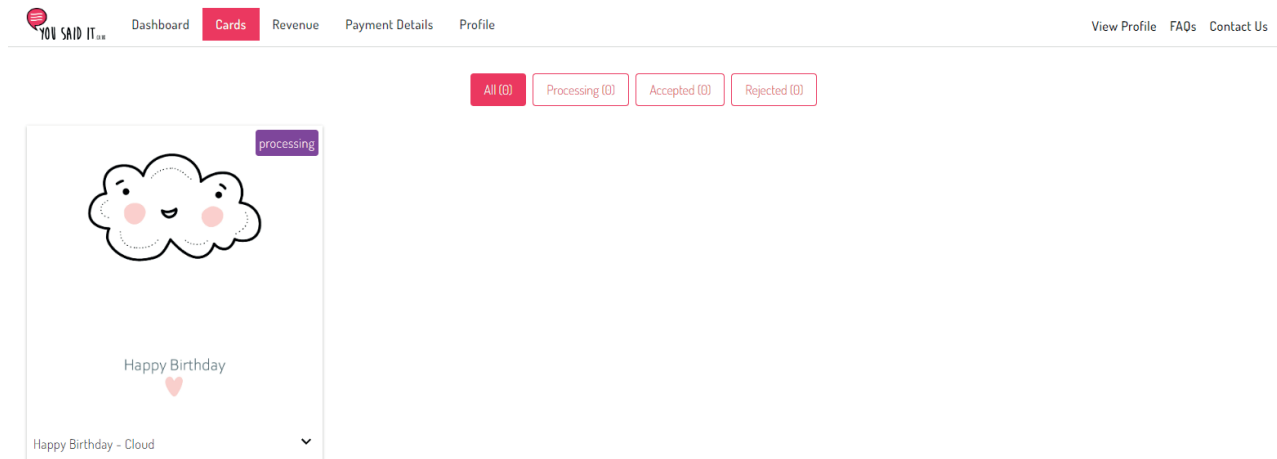

Please note, we only select cards we think our customers would like to buy and there is no guarantee we will add your design to our network channels.

Once you've clicked next on the last page you'll be able to preview all the data and your design before you click submit.

If you're happy with everything, simply click submit and it'll be sent to our team for review.

Please note, it can take a few working days before your artwork is live and displaying on our network.

You'll then return to the Cards page where you'll be able to see all your designs.

You'll also be able to see any notes we've added or request for us to pause or remove your designs.
